

Compact, Self-Contained Family of Sensors

Features

- · Photoelectric sensors in a compact, rugged, sealed, over-molded plastic housing
- Standard 3 mm threaded mounting holes on 25.4 mm (1") spacing
- Advanced ASIC design for excellent noise immunity and cross-talk avoidance
- Threaded metal M8 connector on Pico-style quick-disconnect models
- 10 to 30V dc operation with complementary solid-state outputs (1 normally open, 1 normally closed); PNP (sourcing) or NPN (sinking), depending on model
- · Complete offering of mounting brackets and apertures available

^{*} Only standard 2 m (6.5') cable models are listed. For 9 m (30') cable, add suffix "W/30" to the model number (e.g., Q20E W/30). QD models:

- For 4-pin Pico-style (threaded) integral QD, add suffix "Q7" (e.g., Q20EQ7).
- For 4-pin Pico-style (threaded) 150 mm (6") pigtail QD, add suffix "Q" (e.g., Q20EQ).
- For 4-pin Euro-style 150 mm (6") pigtail QD, add suffix "Q5" (e.g., Q20EQ5).
- For 150 mm (6") PUR pigtail cable with 4-pin threaded Euro-style QD connector, add "QPMA" to the model number (e.g., Q20EQPMA)

^{**}Available with Health or Alarm Mode output; contact factory for details.

WARNING . . . Not To Be Used for Personnel Protection

Never use these products as sensing devices for personnel protection. Doing so could lead to serious injury or death.

These sensors do NOT include the self-checking redundant circuitry necessary to allow their use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition. Consult your current Banner Safety Products catalog for safety products which meet OSHA, ANSI and IEC standards for personnel protection.

Range is specified using a model BRT-84 reflector.

Overview

Banner's Q20 family of sensors offers a full complement of sensing modes, with the excellent performance expected of much larger sensors. Their compact plastic housings feature overmolded construction for superior robustness and sealing. Their popular rectangular design is easy to mount into tight spaces; integral threaded mounting holes eliminate the need for separate mounting nuts.

The single-turn Gain potentiometer on most models and bright Signal LED (positioned on top of the housing for 360° visibility) provide easy alignment and configuration for reliable sensing (see Figure 1).
